I like to watch informative and motivated videos in my free time. I do have sports background so I love to play football over the weekend.

## Profile

I am having 13 years in experience in Full Stack development, conversions for sales team, and Project Management. In 13 years of carrier, I have mostly worked with overseas clients based in Australia, Canada, Europe, USA, Golf Countries etc.

As a Full Stack developer, I have extensive expertise in PHP, WordPress, Magento, Laravel, Zend Framework, Shopify, and other open source technologies. I do have sound experience in HTML, CSS, jQuery, JavaScript, Angular.js, Node.js, Vue.js, React.js,Redux and AWS.

As a Project Manger, I have handled the team of more than 10 people having developers, designers, digital marketers, business development officers. I have used various tools like Asana, Trello, Basecamp, Zira etc to manage the projects.

I have worked with back-end administration also like dealing with servers like AWS, cloud ways, shared servers, ssh, putty, WHM, FileZilla etc.

The followings are my top work samples:

- https://bilmarken.no: This web app is about sale and purchase of the vehicles. This web app is developed in the following tech stack.
  - Frontend: Vue.js
  - Backend: Node.js
- https://www.ccelebs.com/: This is an informative app. This app provides movies, celebrities etc. This web app is developed in the MEAN tech stack.
- https://www.marketersvideoplayer.com/ : This is my product where my client is selling the MVP video player. This video player has taken more than 6 months for the development.
- https://github.com/rohitwebguru/Facebook-Chatgpt-Bot : This is chatgpt based bot. I have developed this bot using node.js.
